

BUILT ENVIRONMENT AWARDS 2021

SUBMISSION FORM

This submission form should be completed and submitted after reading the guidance provided on page 2. Submissions should make reference to the Awards Criteria applicable to the category for which the submission is being made.

[Read our FAQs on Submitting for the Built Environment Awards.](#)

Closing date for your submission(s) **30 June 2021**
Please send all submissions and supporting documents to

[**jordan.sutton@cbuild.com**](mailto:jordan.sutton@cbuild.com)

A separate form should be completed for each award submission.

BUILT ENVIRONMENT AWARDS 2021

SUBMISSION GUIDE

Award Categories

New Build

The CABE New Build Award garners the most submissions of the Built Environment Awards and this high level of competition reflects the fantastic contribution CABE members make in producing cutting-edge new buildings.

Facilities Management or Refurbishment

Existing buildings form the backbone of our everyday lives, so ensuring their proper maintenance and upkeep is absolutely essential to the health and wellbeing of occupants and to its efficiency and value for both society and the environment.

Building Safety & Wellbeing

Recognition for a significant contribution to improving safety or welfare in the built environment including fire safety, fire engineering, risk assessment, structural safety, or public health.

Preservation & Conservation

Demonstrating a project that involves the preservation/conservation of an existing building. Taking into account improvements in quality, accessibility, sustainability and user satisfaction.

Sustainability

The Sustainability Award recognises projects that are not only future-proof, but those that are working to ensure the quality of that future through innovative practices that reduce emissions and a building's overall impact on the environment.

NEW - Digital Transformation

The winner of this award will demonstrate outstanding application or development of digital technologies which have a positive impact on building performance and construction sector productivity.

Built Environment Awards	Quality	Impact	Inclusivity	Client/User Satisfaction	Sustainability
New Build	40%	15%	15%	15%	15%
Preservation & Conservation	30%	10%	20%	20%	20%
Facilities Management or Refurbishment	25%	10%	20%	25%	20%
Sustainability	20%	20%	10%	10%	40%
Building Safety & Wellbeing	30%	30%	15%	15%	10%
	Quality	Impact	Innovation	Scalability/Deployability	
Digital Transformation	20%	30%	30%	20%	

Quality

Explain why your nominated project is of an exceptional quality to merit an award. This could include the quality of the project's design or performance, quality of construction work, innovative or improved site practices, exceptional management practice including project and cost management, or the use of particular skills or techniques. For research, education or academic projects quality could include the quality of insight in identifying the need for the project, the methodology adopted or exceptional practice or techniques in the execution of the work. Emphasis should be given to the complexity of the construction and/or the degree of difficulty in achieving the project objectives.

Inclusivity

CABE is committed to promoting a more inclusive built environment for all. You should explain how the needs of a diverse range of users were taken into consideration including factors such as consultation with the public or specialist user groups; how the project incorporates inclusive design principles in practice; specific features of the design or development of the project that demonstrate good practice and overall how the building contributes to an environment that is more accessible and responsive to user needs or exceptional practice or techniques in the execution of the work. Emphasis should be given to the complexity of the construction and/or the degree of difficulty in achieving the project objectives.

Client/User Satisfaction

Provide examples of how the client/public or user(s) of the project benefit in terms of overall satisfaction and demonstrate how the needs and expectations of the project at inception have been realised. This could include details of how you worked with your client, public or other forms of consultation, post occupancy evaluation, user feedback, clearly identified improvements in outcomes for building users or any other evidence as to how the project has positively benefitted people including clients and the local community.

Impact

Explain why your nominated project is of an exceptional quality to merit an award. Impact includes how your project delivers public benefit, drives innovation, improves productivity, enhances the public realm and supports positive change in industry culture, practice, and safety. This might reflect working practices adopted during the project, aspects of design or research outcomes improvements for building users and the general public. You should provide information on any likely level of industry interest in the project outcome including design, materials, or good working practices, or exceptional practice or techniques in the execution of the work. Emphasis should be given to the complexity of the construction and/or the degree of difficulty in achieving the project objectives.

Sustainability

Provide information on how the project promotes and achieves sound practice in terms of its environmental advantages. This could include energy efficiency, carbon mitigation, embodied carbon and energy, how the project addresses climate change and mitigation, flood resilience, mitigation or prevention, biodiversity, air quality, sustainable transport or infrastructure as well as reduced waste and the circular economy.

Innovation

Synonymous with progression, this vital element is the driving force behind digital transformations in the industry. Innovation is a multi-faceted machine, driving many parts in the same upward trajectory, from increased turnaround, improved communications, creative solutions, and sustainability practice, innovation is an imperative.

Scalability/Deployability

Impact and ease of use are two aspects that enhance and drive excellent projects. Through scalability across the industry – replicating the benefits in a range of projects – and ease of deployment, clients/user satisfaction increases dramatically. Long-lasting, successful projects are built for growth and accessibility.

For more information please go to cbuide.com/BE2021

Important Note:

It is assumed that all projects submitted for consideration will comply with all statutory and legislative requirements and such other regulatory systems and codes of practice that are deemed relevant. Where such compliance is not evident and no satisfactory explanation is available, the project will not be considered.

BUILT ENVIRONMENT AWARDS 2021

SUBMISSION FORM

Name of Project:

Please ensure accuracy as this title will appear on the award if you win.

Address of Project:

A separate form should be completed for each award submission.

Project Contact:

Contact Role:

Member Contact:

Member No.:

Member's Role and Involvement within the Project:

Official Name for Award Winner (Company/Individual):

Please ensure accuracy as this title will appear on the award if you win.

Contact Telephone No.:

E-mail:

Social Media

Will be used in the event that the project wins to promote the award. *Leave blank if not applicable.*

BUILT ENVIRONMENT AWARDS 2021

SUBMISSION FORM

This form should accompany the award submission.

The form has been designed to encourage the submitter to detail areas of exemplary work that the Awards Panel should consider when reviewing the submission.

It is assumed that all projects submitted for consideration will comply with all statutory and legislative requirements and such other regulatory systems and codes of practice that are deemed relevant. Where such compliance is not evident and no satisfactory explanation is available, the project will not be considered.

Project description and justification for award:

Clearly referencing the award assessment criteria, set out why the project is deserving of a CABE Built Environment Award, referencing supporting information where appropriate. This section should be 1,200 – 1,500 words in length.
